

MECENAZGO

En muchos países existe una cultura del mecenazgo privado promotor de un gran número de desarrollos científicos y artísticos. En la actualidad, dadas las limitaciones económicas presentes sobre todo en Europa, se debe prestar atención a apoyar iniciativas privadas de patronazgo para el desarrollo de la investigación y la cultura.

PATRONAGE

In many countries there exists a culture of a sponsorship which is responsible for many Artistic and Scientific developments. At this time, given the economic situation in Europe, sponsorship by private organizations becomes critical for many cultural and scientific purposes. We wish to affirm a need for this cultural tradition to become a cultural norm across all countries, especially in Europe.
